

**Posting Title:** Business Intelligence & Data Integration, Solutions Architect  
**Location:** National (United States)

**Current Need:**

The successful candidate will have experience leading successful business intelligence, data integration, and data quality implementations within large and mid-sized organizations. They should be excellent at working with teams, overcoming technical challenges, and delivering architected solutions to support technology transformations.

**Position Description:**

As a Solutions Architect you will architect business intelligence and data warehouse solutions for our clients. Familiarity with IBI's iWay product line is ideal; however, not mandatory as you will be trained if unfamiliar with a particular platform. However, the selected candidate must possess broad industry knowledge and broad expertise in a wide range of products, systems, packages, applications, and deployment environments. The primary role of this position is to lead the architectural creation of business intelligence and data integration solution design and support in the execution of development initiatives to support technology transformations. You will oversee mid-sized and large scale, enterprise level engagements and serve as the core technical team's lead architect. Candidate should be comfortable balancing multiple concurrent projects while ensuring deliverables are met. Responsibilities include planning team objectives, defining tasks, evaluating requirements, controlling and monitoring quality, checking performance, scrutinizing progress, reporting status to both management and project team, and performing work: performing planning, discovery, analysis, implementation, post-development support, & business case consulting. Candidate will align IT objectives with client's business objectives both tactically and strategically. Tasks will include developing work methods to craft development activities to ensure team functional cohesiveness. You will have strong leadership skills with ability to lead execution of development, progress, and change. Architect will have strong system and software architectural background for people, processes, and technologies. Moreover, you will have solution experience with the ability to provide solutions within various Application, Server, Storage, Network, Facilities, Business Continuity & other technology disciplines. You will have superb ability to leverage, select, and analyze discovery and implementation tools to perform gap analysis and technical assessments. You will have assessment ability with an understanding of how to get an organization from their current environment to the proposed end state environment while maneuvering through and overcoming the gaps/challenges. Candidate will have detail knowledge of business intelligence, data integration, and data quality planning, design, and architecture. As well as, procedures, and execution related to system/application development and execution coupled with evaluation of alternative skills and ability for decision making. In addition, you will have strong communication, negotiating, and people management skills. Candidate will lead teams of engineers & maintain strong team atmosphere, promote effective solutions delivery, and ensure quality and integrity of work.

**General Requirements:**

- 15-20 years of IT Architectural experience including 10+ years of data processing experience.
- 8+ years of technical services support/consulting experience. .
- Top-rate engineering/architectural skills across multiple IT platforms. (Wintel, UNIX, HP-UX, AIX, etc...)
- Broad working knowledge in most technologies, and the ability to ramp up quickly on any system.
- Excellent working knowledge of IBI/iWay products on at least two platforms a plus.
- Excellent written and verbal communication skills with ability to communicate clearly and straightforward.
- Ability to identify complementary solutions to provide value to our customers.
- Willing to travel 50-75%.

**Minimum Requirements:**

- 10+ years of business intelligence and data integration architectural experience.
- Exceptional client relationship management experience with strong technical and written and verbal skills.
- Self-motivated who takes initiative and works well in a team environment with the ability to meet deadlines.

**Education:**

- 4-year degree in computer science or related field or equivalent experience (Master's Degree Preferred)
